28 September – 2 October
Computer Science and Information Technology
Week in Armenia

Workshop

UNL – Universal Networking Language

In conjunction with
7th International Conference
"COMPUTER SIENCE &
INFORMATION TECHNOLOGY - 2009"
(CSIT-2009)

Call for papers

Program Committee:
T. Della Senta
Yu. Shoukourian

Local Organizing committee:
A. Manukyan
A. Avetisyan

Contact Person:
Y. Grishkyan

Contact address:
Institute for Informatics and Automation Problems
1 P. Sevak st., Yerevan, 0014, Armenia

E-mail: csit@sci.am, unl@sci.am
Phone: (37410) 527090, 282040,
Fax (37410) 569281

Authors are invited to submit papers in PDF format
(template available on the Conference site) by the
submission system. Accepted papers will be
published (up to 4 pages in length) in the
Conference Proceedings.

Important dates:
Paper submission: deadline: **July 30, 2009**
Notification of acceptance: **August 10, 2009**
Final paper due to: **August 20, 2009**
Deadline for registration **August 30, 2009**

Detailed information available on the Conference
official site: http://csit.am/2009

Registration fee for Participants - 200€
For students - 50€

Aim:
UNL is a long term initiative. This is such a
language technology which enables different
nations to communicate with each other in their
own native language. The UNL is a computer
language that enables computers to process
information and knowledge. It is an artificial
language that replicates the functions of natural
languages. Using the UNL people can express all
kinds of information and knowledge that conveyed
by natural languages and computers can
intercommunicate using such information and
knowledge. The UNL Program is being developed
by the Institute of Advanced Studies of the United
Nations University (UNU/IAS) in cooperation with
research groups from around the world. The initial
stage of the UNL Programme involves the
development of modules for 17 languages.
Armenian group of UNL researchers particularly
Institute for Informatics and Automation Problems
of the National Academy of Sciences of the
Republic of Armenia and the Institute of
Linguistics of the NAS of RA have shifted their
researchers' focus beyond the application of new
information and communication technologies, thus,
emphasizing their attention to all the aspects of the
UNL investigations.
Since February 2002 Armenia also became a
member of the UNL society and signed an
agreement with the UNDL foundation. For a long
time a lot of work has being done to establish UNL
Armenian Module. Issues on the above mentioned
field will be discussed in the Conference.

**Program of workshop will include 1-day
international symposium to discuss theoretical
and technical issues on the basis of papers and
demos, 3-day introductory seminar to UNL for
people interested in knowing the UNL or
expecting to start working on it.**

Support of the workshop: UNDL foundation,
Institute for Informatics and Automation Problems
of NAS of RA, UNL Armenian Language Centre.
